**SECOND MID TERM EXAMINATION**  
**B.TECH. PROGRAMMES (UNDER THE AEGIS OF USICT)**  
**Second Semester, April-May 2026**

**Paper Code: BS-110****Sub: Environmental Studies****Time: 1½ Hrs.****Max Marks: 30**

| <b>Note: Attempt Q. No. 1, which is compulsory, and any two more questions from the remaining.</b> |                                                                                                                                                                      |                   |              |
|----------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|--------------|
| <b>Q. No.</b>                                                                                      | <b>Questions</b>                                                                                                                                                     | <b>Max. Marks</b> | <b>CO(s)</b> |
| <b>1.</b>                                                                                          | <b>Attempt any four of the following:</b>                                                                                                                            | <b>(2.5 × 4)</b>  |              |
| <b>a.</b>                                                                                          | Environmental protection, economic growth, and social development are the three pillars of sustainable development. Justify the statement as per your understanding. |                   | CO3          |
| <b>b.</b>                                                                                          | Explain the Energy Related Urban Problems.                                                                                                                           |                   | CO3          |
| <b>c.</b>                                                                                          | Describe the concept of Wasteland Reclamation.                                                                                                                       |                   | CO3          |
| <b>d.</b>                                                                                          | How does value education contribute to a better understanding of environmental issues?                                                                               |                   | CO4          |
| <b>e.</b>                                                                                          | Illustrate the various problems affecting the women and child welfare.                                                                                               |                   | CO4          |
| <b>2. a.</b>                                                                                       | What is meant by EIA? Why is it essential to have EIA before the development of any project?                                                                         | 5                 | CO3          |
| <b>b.</b>                                                                                          | Write short notes on the following:<br>(i) CO <sub>2</sub> Sequestration    (ii) Kyoto Protocol                                                                      | 5                 | CO3          |
| <b>3. a.</b>                                                                                       | Discover the various contributory factors to population explosion. Enumerate its effects.                                                                            | 5                 | CO4          |
| <b>b.</b>                                                                                          | Discuss the role of IT in Protection of environment and Human health giving some practical examples.                                                                 | 5                 | CO4          |
| <b>4. a.</b>                                                                                       | Explain the concept of consumerism and its effects on the environment.                                                                                               | 5                 | CO4          |
| <b>b.</b>                                                                                          | What is AIDS? Write the major precautions that should be taken to avoid AIDS.                                                                                        | 5                 | CO4          |
