**MID TERM EXAMINATION**  
**B.TECH. PROGRAMMES (UNDER THE AEGIS OF USICT)**  
**Second Semester, April 2024**

**Paper Code: BS-110****Sub: Environmental Studies****Time: 1½ Hrs.****Max Marks: 30**

**Note: Attempt Q. No. 1, which is compulsory and any two more questions from the remaining.**

| Q. No.       | Questions                                                                                                                                | Max. Marks       | CO(s) |
|--------------|------------------------------------------------------------------------------------------------------------------------------------------|------------------|-------|
| <b>1.</b>    | <b>Explain the following...</b>                                                                                                          | <b>(2.0 × 5)</b> |       |
| <b>a.</b>    | How can individuals contribute to the process of improving the environment?                                                              |                  | CO1   |
| <b>b.</b>    | What is the criterion for a place to be designated as a hotspot of biodiversity?                                                         |                  | CO1   |
| <b>c.</b>    | Estuaries are highly productive for biological life. Justify the statement.                                                              |                  | CO1   |
| <b>d.</b>    | What is Carbon sequestration?                                                                                                            |                  | CO2   |
| <b>e.</b>    | Write the causes and control measures of Eutrophication?                                                                                 |                  | CO2   |
| <b>2. a.</b> | Define biopiracy? Explain with suitable example that biopiracy is unethical.                                                             | 5                | CO1   |
| <b>b.</b>    | How biogeochemical cycle helps to regulate an ecosystem? Explain any one biogeochemical cycle with the help of a cyclic diagram.         | 5                | CO1   |
| <b>3. a.</b> | Differentiate between pyramid of number and pyramid of energy for a forest ecosystem. Explain why pyramid of energy is always upright?   | 5                | CO1   |
| <b>b.</b>    | How renewable energy is beneficial to achieve sustainable development? Briefly describe different methods of renewable power generation. | 5                | CO1   |
| <b>4. a.</b> | How does thermal pollution affect aquatic life? Explain the means to control thermal pollution.                                          | 5                | CO2   |
| <b>b.</b>    | What are the different steps for disaster management cycle? Write down one case study to explain nuclear disaster.                       | 5                | CO2   |
